I am actively looking to find employment that includes growth and development within the company, my strengths are reliability, stability, stress resistance and vast experience technology and I also have various skills including problem solving. I have many years' experiences of web development and currently volunteering on a detailed project in Hull that help the Ukrainian community fleeing war. My goal is to become a successful employee in a recognised industry to develop websites using the latest technology to transform designers and their creations.

EXPERIENCE

02.05.2021 – 29.12.2022
